

**Honda CBR600RR Heatshield Template**

1. Cut out template.
2. Cut template down the dashed line.
2. Place templates on adhesive side (not the foil side) of adhesive foil heatshield with this side up.
3. Cut along all solid lines.
4. Remove adhesive backing from adhesive foil heatshield.
5. Carefully install adhesive foil heatshield to the undertail section of the motorcycle. (Note: The template is designed to have 1/2" overlap. Line up circles on the paper template to get an idea for the proper positioning.)
6. Use the remaining scrap pieces of adhesive foil heatshield to cover any additional areas that will be exposed to heat.
