- 9. Install (No. 7) *11600-HS,* heatshield using (No. 8,9) 6mm screws provided in the kit as shown on the assembly diagram.
- Before starting vehicle, check for proper clearance between new exhaust system and rear suspension (i.e. tire, swingarm, brakes, rear shock, and etc.) If any problem is found, please carefully follow through the installation steps again. If problem still persists, please call Yoshimura Tech Department at (800) 634-9166 / in CA (909) 628-4722.

- 11. It is recommended that the muffler and tailpipe be wiped down with rubbing alcohol to remove oil and fingerprints. This will help prevent tarnishing of the finish after the exhaust is heated up.
  - Note: After starting motorcycle, it is normal for new exhaust system and muffler to emit smoke until oil residue burns off.
