**MICHELIN POWER ULTIMATE**

Time	Warm up	Wear	Handling
●●●○○	●●●○○	●●●○○	●●●○○

**MICHELIN POWER PERFORMANCE**

Time	Warm up	Wear	Handling
●●●●●	●●●●●	●●●●○	●●●●●

(1) Inflation pressure inserted with tyre and wheel at ambient temperature, just before the first ride or installing heating blankets.  
(2) Michelin recommends setting the heating blanket temperature at 90°C. Pressure values are indicative and depend on the equipment and its good working order.

**FRONT**

**REAR**

Minimum cold pressure on circuit <sup>(1)</sup>	2,1	1,3
Hot pressure under heating blankets <sup>(2)</sup>	2,3	1,5
Hot target pressure (after 4 laps)	2,4	1,6
